

Sprint 4: Final Testing, Polish & Submission Prep

 Goal: Refine features, fix bugs, write documentation, and prepare for demo and final submission.

Final Feature Polish

- ☐ Review UI/UX across all pages for consistency
 - ☐ Ensure all buttons (Share, Logout, Add Habit) are functional
 - ☐ Validate that dynamic content (charts, calendar, stats) loads correctly
 - ☐ Test user authentication flow and session handling
-

Testing & Quality Assurance

- ☐ Write unit tests for:
 - ☐ User login/register
 - ☐ Habit entry creation
 - ☐ Weekly stats calculation
 - ☐ Test responsiveness on mobile/tablet
 - ☐ Ensure app handles missing or no-data scenarios
 - ☐ Validate edge cases (e.g., duplicate habits, leap year)
-

Documentation & Submission Files

- ☐ Complete **README.md** with:
 - ☐ App purpose and usage
 - ☐ Setup instructions
 - ☐ How to run tests
 - ☐ Contributor list with UWA ID, name, GitHub handle
 - ☐ Create **requirements.txt** using **pip freeze**
 - ☐ Include test database (if needed) for demo
 - ☐ Ensure no **.venv/**, **.git/**, or cache files are included
-

Submission & GitHub Prep

- ☐ Push all final code to public GitHub repo
 - ☐ Verify GitHub Insights are visible
 - ☐ Zip the full project (excluding **.venv/**, **.git/**)
 - ☐ Submit zip file on LMS (only one person needs to submit)
-

Demo Preparation

- ☐ Assign presentation parts to each team member
 - ☐ Prepare a script or demo flow (max 8 mins)
 - ☐ Rehearse demo and anticipate questions
 - ☐ Ensure app is deployed or ready to run locally with a test DB
-

Optional Enhancements (If Time Allows)

- ☐ Add user profile customization
- ☐ Implement dark mode or accessibility options
- ☐ Export report as image or PDF
